

The Edsun, extended family of Aluminum Parabolics includes the 2-5/8" deep “LYP” Parabolic Louver. The bold look and superior lamp obscuration of the deep cell louver creates a dramatic appearance. The “LYP” features extraordinary efficiency and light control with a low brightness accent in a grid ceiling. Standard finish is non-iridescent Semi-Specular Silver.

Aluminum is ideal for easy maintenance, cleaning and durability. Fingerprints wipe off with a damp cloth.

Convert any standard recessed fluorescent fixture to a high tech, low brightness luminaire. It's as simple as 1,2,3. It's economical and immediately available from stock.

The “LYP” is used with static handling fixtures, as well as where good lighting control is essential. It meets all rigid fire codes and is excellent for new and retrofit lighting applications where high efficiency is required.

Applications:

- Medical Facilities
- Department Stores
- Showrooms
- Commercial & Municipal Buildings
- Entries & Corridors
- Office Task Areas
- Banks
- Conference Rooms
