VAPOR TITE DATA SHEET

Vapor Tite Series of fixture enclosures allows the lighting OEM to produce a traditional vapor tite luminaire with an improved housing design to allow more dust and environmental elements to be removed from the luminaire enclosure as opposed to traditional vapor tite enclosures. The standard housing, constructed of self-extinguishing SMC fiberglass compound, is rated to accept existing industry standard enclosed strip fixtures.

Standard depth diffusers are available on 4' and 8' sizes. 50% impact acrylic and 100% impact acrylic are diffuser material options as well as clear matte polycarbonate diffusers.

A full range of accessories is available— stainless steel latches, tamper proof options, and various mounting brackets.

VT Vapor Tite series is UL Listed for outdoor wet location environments with a IP-65 ingress rating, and is accepted by NSF International for non-food zone applications.
