

ESLP24

Surface mount 2x4 parabolic.

Surface mount parabolic 2X4 light fixtures with 3 lamps are the standard for glare reduction in office lighting. The deep cell parabolic grid conceals the light at critical viewing angles. These are ready for T8 lamps with an electronic ballast which are standard in the fixture. It's a universal voltage of 120 / 277 volt which automatically senses the voltage you have and works properly. If you have offices with computer screens, and who doesn't, these will deliver improved performance over regular lensed troffers.

- Electronic ballasts designed for T8 or T5 lamps.
- Does not include lamps, whip, ballast disconnect.
- Reduces computer screen glare in office lighting.
- 3 lamp also available for 2 or 4 lamp. Chrome reflectors available for 2 or 3 lamp.
- 1-1/2" deep cell. 18 cell.
- Dimension: W = 2 feet L = 4 feet.
- 120 / 277 volt universal voltage.

T5
